

Matt Maitland

Technical support specialist working on Full Swing simulator systems through Auxillium. I troubleshoot remote issues across calibration, licensing, display, networking, Windows, and connected hardware, often with incomplete logs and no direct hardware access. Outside work, I build web and audio tools to understand systems better and make useful things I would like to see exist, including mmaitland.dev, StringFlux, and Research Radar.

contact@mmaitland.dev | Colorado, USA | github.com/mmaitland300

EXPERIENCE

Independent Software and Audio Development

2022 - Present

Self-directed

Self-directed web and audio software built around things I wanted to understand better or tools I wanted to use, maintained around full-time work with public notes on scope, decisions, and limits.

- [Built `mmaitland.dev` with typed content, CI, smoke tests, contact validation, rate limiting, and optional admin workflows.](#)
 - [Building StringFlux in JUCE/C++ with focus on real-time-safe behavior, narrow scope, and documented tradeoffs.](#)
 - Write case studies and decision notes so project pages explain the decisions, limits, and current state behind the demos and repositories.
-

Technical Support / Product Support Specialist

April 2024 - Present

Auxillium (technical support for Full Swing)

Diagnose remote simulator issues across calibration, licensing, display, networking, OS, and peripheral layers in customer production environments.

- [Built repeatable triage notes for recurring failure patterns so similar tickets start from the right isolation steps instead of from scratch.](#)
 - Support Full Swing-first environments with Laser Shot and E6 Golf from TruGolf often present on the same install.
-

SKILLS

Core Skills

Troubleshooting, Windows systems, Networking / TCP/IP, TypeScript, Next.js, React, Git / GitHub, Technical communication

Production / Working

Prisma, PostgreSQL, Auth.js, Tailwind CSS, Python, Zod, Resend / Upstash, C++, JUCE, DSP

Familiar / Earlier work

Flask / Django, MySQL, MongoDB, Machine Learning / CNN, Apache

EDUCATION

Bachelor's in Biochemistry

University of South Florida

January 2014 to December 2016

Associate in General Studies

Florida Southwestern State College

January 2008 to December 2011

CERTIFICATIONS

CompTIA A+

July 2023 to July 2026

Validated hands-on skills across hardware, software, networking, troubleshooting, security, mobile devices, and customer support.
